

Tech Talk

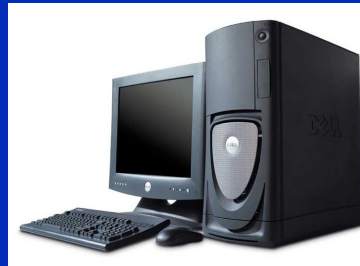

ISSUE 1 2010

TERM 2

Inside this issue:

How to
Ideas
Tips
Information
On computer club

In this edition of tech talk there will be tips and ideas updated on teaching lessons that have been taught in previous computer club. There will be reviews on programs, most improved people in computer club. Also in this edition there will be some information on computer club times, dates and lessons that would be taught. The computer club has been very interested in computer club. We are thanking people who have tried there hardest in computer club they will receive an award. A big thankyou to Mr Edwards for his time on Wednesday lunch times.

At the end of this term, we are sad to say that the existing computer club members will no longer be in computer club. Due to new term and having a fair share in goes in the computer club. If you wish to be in it in Term 3's computer club, please pick up a note from Dayne or Evan in 6E. Check the back page for more details on computer club and rosters and programs.

How to use Wikispaces.

Step 1. Go to Google.

Step 2. Type in Wikispaces.

Step 3. Sign up.

Step 4. Put in your details.

Step 5. Once you have signed up and filled in your details confirm your e-mail address.

Step 6. You will be taken to your new Wikispace home page.

Step 7. Then you will be able to edit your home.

Step 8. Edit your home page once you have put things that you want on your home page press save in the right hand corner.

Step 9. When you have done all of that you will be able to Create a new page by clicking new page in the left hand corner side bar.

Step 10. When you have clicked on New page put your page name in e.g. Cats.

Step 11. You will come to the page you created and it will be the same as when you edited.

Step 12. Once you have customized your pages and home page you can invite people to join. Go to manage wiki on the left side bar. Click on it then go to members under People.

Step 13. Scroll down to the bottom page put the persons e-mail or username in the text box. Then type your message that they will receive when they check their wiki or e-mail.

That's about it. For using wikispaces

Next term

We will be focusing on website creating. There are many different things to do on the web, games, blogs, wiki and even you can create your own things if you want to choose.

That is what we will be focusing on! These are just a few websites we will be using.

Wikispaces

Webs

Doodlekit

Much more.

The aim of the computer club is to have fun and (of course!) to get you onto more interesting stuff, instead of the old stuff like using word and powerpoint.

HAVE FUN!

Websites to see

In term 2 we have learnt many different things on the web. In term three our theme will be website creating, we will be doing more on Wikispaces and doodle kit and maybe even webs. These are all things to do with creating websites.

It will be fun and quite interesting.

In term 2 we have been starting up and have taught a lot of different stuff. We will replace all who was in it in term 2 so other people can join in.

If you want to be in it again you can register again.

I hope I will see some unfamiliar and familiar faces.

Also! On this page will be lots of cool websites to visit.

From Evan

Pintogames

<http://www.pintogames.webs.com>

At this website you can play fun games, watch Youtube videos and much more!

Enjoy Homemade videos and even games and you may get a Membership, which means you could get some great cheats on different things.

Roblox

<http://www.roblox.com>

For you early computer, people, this is the place to be! An early learning game-making facility. You can visit many games that other people have made and join to get an awesome game creator. With bazoucas, lego and much more.

This is a chat website as well.

You can also make friends!

And much more.

Psst!

You want a place next term, I can guarantee you a spot!

Just Email me and keep checking your SCHOOL Email!

Webs!

Free website creator!

www.webs.com

Create Easy, fun and intelligent websites here!

Embed videos and much more!

You can't get to it from school.

Doodlekit

www.doodlekit.com

Free website creator!

Pretty much the same as webs but more secure and you can get to it from school.

Scratch

Type in: Scratch, into Google.

Scratch is a website that allows you to program sprites to do as you want to do.

Computer Club Details.
Time

Day/Time: Wednesdays lunch time.

Where: Year 6 corridor

Run By: Dayne and Evan.

12 People only each lunch!

There will be a meeting held on thursday 24th of June.

Stay tuned!

Tips!

Always check your school Email

Always go by the motto: Go Computers!

Always enjoy your life ... AND

HAVE FUN!

Please check your School Email regularly for later additions and messages from teachers and other students.

KEEP COMPUTING
